Vehicle Type: Sports Coupe / Convertible | Segment: Supercar / V8 Sports | Locally Built: Yes
Assembly Plants (AU): Mordialloc, Victoria

## 1. MODEL OVERVIEW & AUSTRALIAN MARKET NOTES

The Bolwell Nagari (Mk VIII) was Australia's premier bespoke production sports car, built by Campbell and Graeme Bolwell in Mordialloc, Melbourne. Featuring an ultra-rigid Y-shaped steel backbone chassis, breathtaking fiberglass coachwork, and Ford 302ci/351ci Windsor and Cleveland V8 engines, the Nagari weighed just 1,040 kg and accelerated from 0-100 km/h in 5.8 seconds, outpacing contemporary European exotics. A total of 127 units (100 coupes and 27 convertibles) were built.

Conceived after Graeme Bolwell worked with Colin Chapman at Lotus in England, the Nagari was sold as a fully built, road-compliant production car. Using an Austin 1800-derived front suspension with unequal wishbones and a live Ford rear axle with trailing arms and Panhard rod, the Nagari offered outstanding handling and explosive straight-line acceleration.

### SERIES / GENERATION: Mk-VIII (Nagari Mk VIII) [1970-1974]

Body Styles: 2-door coupe, 2-door convertible | ANCAP: None
