1. MODEL OVERVIEW & AUSTRALIAN MARKET NOTES

The Ford F-Series is an enduring pillar of Australian outback, farming, and heavy towing histor
y. Locally assembled in Australia across multiple decades in Victoria, New South Wales, and Que
ensland, Australian F-100s, F-250s, and F-350s were specifically tailored for harsh Aussie work
, utilizing local 250ci Falcon straight-sixes, 300ci big sixes, and Geelong-cast 302ci and 351c
i Cleveland V8s. In 2001, Ford Australia officially returned to the heavy-duty market with the
mighty RN-series F-250 and F-350, powered by the thunderous 7.3L Navistar Power Stroke Turbo Di
esel V8 (175 kW / 684 Nm), creating a cult legend among caravan haulers. In 2023, Ford Australi
a officially launched the Next-Gen F-150 in Australia, remanufactured to OEM right-hand drive i
n Mickleham, Victoria featuring the 298 kW 3.5L EcoBoost twin-turbo V6 and 4.5-tonne towing cap
acity.

Australian-assembled F-100s and F-250s featured unique 'Ambulance' high-output alternators, dua
l fuel tanks, heavy-duty Dana axles, and Australian-built Cleveland V8 engines manufactured at
Geelong. The 2001-2007 RN F-250 with the 7.3L Power Stroke V8 became an instant legend, with se
cond-hand examples frequently selling for higher than their original retail prices two decades
later.

SERIES / GENERATION: Sixth-Seventh-Gen-AU (Sixth & Seventh Gen F-100 / F-250 (Australian Assembly)) [1973-199
