1. MODEL OVERVIEW & AUSTRALIAN MARKET NOTES

The Ford Fairlane and LTD was Australia's definitive long-wheelbase luxury prestige sedan. Span ning four decades and eleven model series from the 1967 ZA to the 2007 BF Mk II, the Fairlane d ominated Australian corporate, hire-car, and government limousine fleets. In 1973, Ford introdu ced the ultra-exclusive LTD (P5) riding on a limousine-class 121-inch wheelbase with concealed headlamps and standard 351 Cleveland V8. The Fairlane and LTD offered effortless V8 cruising, c avernous rear legroom, and refined Australian engineering.

Engineered by stretching the Falcon's wheelbase behind the B-pillar, the 1967 ZA Fairlane was a brilliant marketing stroke, completely outselling Holden's imported and adapted prestige offer ings and prompting Holden to hurriedly develop the Brougham and Statesman. In 1973, the Austral ian LTD was born as the most expensive and luxurious domestic car in Australia. The line transi tioned through modern alloy-head EFI sixes in the 1980s, the return of Windsor V8 power in the 1990s, Tickford performance editions, and the 5.4L 3-valve V8 in the final BA/BF series.

SERIES / GENERATION: ZA-ZD (First Generation (ZA to ZD)) [1967-1972]
