1. MODEL OVERVIEW & AUSTRALIAN MARKET NOTES

The Ford Focus replaced the Laser in 2002 and immediately established itself as Australia's ben
chmark dynamic driver's car in the compact segment thanks to its revolutionary 'Control Blade'
multi-link rear suspension. Across four generations (LR, LT/LV, LW/LZ, and SA), the Focus earne
d critical acclaim. For Australian car enthusiasts, the Focus name was cemented by legendary pe
rformance flagships: the 2.0L high-revving LR ST170 (127 kW), the five-cylinder turbo LT/LV XR5
Turbo (166 kW 2.5L Volvo turbo) and limited-edition 224 kW Focus RS, the sensational 257 kW dr
ift-mode AWD LZ Focus RS, and the nimble SA Focus ST.

The LT/LV Focus XR5 Turbo achieved massive cult status in Australia, embraced for the thunderou
s 5-cylinder warble of its turbocharged engine and exceptional chassis composure. In 2016, the
LZ Focus RS created a national sensation when all 500 Australian allocation units sold out in d
ays, driven by its 257 kW twin-scroll turbo engine and headline-grabbing 'Drift Mode' all-wheel
drive.
