1. MODEL OVERVIEW & AUSTRALIAN MARKET NOTES

The Ford Ranger is Australia’s best-selling vehicle and one of the country’s crowning engineeri
ng triumphs. Designed, engineered, and developed from the ground up by Ford Australia’s 2,000-s
trong engineering and design team at Campbellfield, Victoria and the You Yangs Proving Ground,
the Ranger is exported to over 180 countries. Across the PJ/PK, the revolutionary T6 (PX I, II,
III), and the Next-Gen (PY), the Ranger redefined dual-cab refinement, off-road ability, and h
igh-speed off-road performance through the bespoke Ranger Raptor.

In 2006, Ford replaced the Courier with the PJ Ranger. In 2011, Ford Australia unveiled ’Projec
t T6’ (PX Ranger)?the first vehicle developed from a clean sheet in Australia for global Ford t
ruck production. It introduced the rugged 3.2L 5-cylinder Duratorq diesel, 3.5-tonne towing, an
d 800mm water wading. In 2018, Ford Australia launched the Ranger Raptor featuring Fox Racing 2
.5-inch Internal Bypass dampers and coil-sprung Watts-link rear suspension. In 2022, the Next-G
en (PY) Ranger debuted with a 3.0L V6 Turbo Diesel (184kW/600Nm) and the Raptor packing a twin-
turbo 3.0L EcoBoost V6 producing 292kW, becoming Australia’s #1 selling motor vehicle overall.
