1. MODEL OVERVIEW & AUSTRALIAN MARKET NOTES

The Giocattolo Group B was an authentic Australian mid-engine supercar engineered by entreprene ur Paul Halstead and former McLaren Formula One designer Barry Lock in Caloundra, Queensland. S tarting with imported Alfa Romeo Sprint bodyshells, Halstead and Lock discarded the front-drive powertrain and installed a mid-mounted Walkinshaw-fettled Holden Special Vehicles 5.0L Group A V8 (220kW/300hp), a bespoke ZF 5DS-25/2 five-speed transaxle, Kevlar/carbon-fibre composite bo dywork, and Brembo racing brakes. Accelerating from 0-100 km/h in 4.5 seconds with a top speed of 260 km/h, only 15 production cars were built before funding ended in 1989.

Lock fabricated an aerospace tubular steel rear spaceframe incorporating double-wishbone suspen sion and cockpit-adjustable sway bars. The HSV-supplied Holden 5.0L V8 sat directly behind the driver’s ears, matched to the same ZF transaxle used in the Ford GT40 and BMW M1. Weighing only 1,085 kg, the Giocattolo was faster than contemporary Ferraris and Lamborghinis.
