AUSTRALIAN AUTOMOTIVE ARCHIVE - TECHNICAL & SPECIFICATION DOSSIER

Make: Lightburn | Model: Lightburn Zeta Sedan | Australian Market Years: 1963-1965
Vehicle Type: Microcar | Segment: Micro / City Car | Locally Built: Yes
Assembly Plants (AU): Camden Park, South Australia

1. MODEL OVERVIEW & AUSTRALIAN MARKET NOTES

The Lightburn Zeta was South Australia's unique fiberglass microcar, manufactured by industrial equipment firm Lightburn & Co. in Camden Park, Adelaide. Powered by a British Villiers 324cc t wo-stroke twin-cylinder motorcycle engine driving the front wheels through a 4-speed sequential dog transaxle without reverse (the engine was stopped and restarted in reverse rotation), the Zeta was impervious to corrosion and designed to provide economical suburban motoring.

Conceived by Harold Lightburn to compete with second-hand family sedans and the BMC Mini, the Z eta featured a one-piece reinforced fiberglass body. Remarkably, it had no external boot lid?ca rgo was loaded over the back seat. Around 363 sedans and utilities and 28 Zeta Sports roadsters were manufactured before high interior noise and fierce competition ended production in 1966.

SERIES / GENERATION: Zeta-Sedan (Zeta Sedan) [1963-1965]

Body Styles: 2-door micro sedan | ANCAP: None
Villiers 324cc 2-stroke twin, front-wheel drive, independent rubber suspension, reversible igni tion key for reversing.

Engines Offered in Australia:

- Villiers-324-2T: 0.32L (324cc) Inline2 (Naturally Aspirated, Petrol / 2-Stroke Oil Premix) | 12.3 kW

Australian Badges / Trims:

- Sedan: Drivetrain=FWD, Trans=4-speed sequential dog clutch manual, AUD $1196-$1290, Fuel=5.6L/100km

Factory Configurations:

* Sedan | 2-door sedan | Villiers-324-2T | 4-speed sequential dog clutch manual | FWD | 12.3kW/28.0Nm
