1. MODEL OVERVIEW & AUSTRALIAN MARKET NOTES

The Mitsubishi Magna was an Australian manufacturing triumph, designed specifically for Australian conditions by widening the Japanese Galant by 66mm. Produced at Tonsley Park in Adelaide, it won two Wheels Car of the Year awards (1985, 1996) and culminated in the 180kW Magna Ralliart and revolutionary Magna AWD.

Engineered at Tonsley Park to take on the Ford Falcon and Holden Commodore, the Magna pioneered widebody transverse front-wheel-drive dynamics and whisper-quiet Astron II and 6G72/6G74 V6 engines. The Australian-designed station wagon was a massive export earner to the United States (as the Diamante) and Japan. In 2002, MMAL launched the Magna Ralliart and the all-wheel-drive Magna AWD featuring the QuadTec system.
