Vehicle Type: Cab Chassis / Van / Bus | Segment: Heavy-Duty All-Terrain Commercial | Locally Built: Yes
Assembly Plants (AU): Bibra Lake, Western Australia

1. MODEL OVERVIEW & AUSTRALIAN MARKET NOTES

The OKA 4x4 was an uncompromising, severe-duty all-terrain four-wheel-drive commercial truck ma
nufactured in Bibra Lake, Perth, Western Australia. Engineered specifically to endure the most
punishing outback corrugations, mine sites, and desert terrain across Australia, the OKA featur
ed an indestructible heavy-duty perimeter box-section chassis, Dana 60 front and Dana 70 rear l
ive drive axles, New Process transfer case, and Perkins/Cummins turbo-diesel power across LT, X
T, and NT generations.

Designed for severe 5.5-tonne GVM operation where standard LandCruisers and Land Rovers suffere
d chassis fatigue, the OKA became the backbone of mining operations in the Pilbara, Telstra out
back line maintenance in the Northern Territory, outback safari touring through the Tanami and
Simpson deserts, and rural fire services. Over 500 units were manufactured.
