1. MODEL OVERVIEW & AUSTRALIAN MARKET NOTES

The aristocrats of French hot hatch engineering. For more than three decades in Australia, Peug
eot's GTi lineage defined what a front-wheel drive performance car could achieve. From the feat
herweight, razor-sharp 205 GTi 1.9 that reset international benchmarks, through the passive rea
r-steering 306 GTi-6 with its class-first six-speed manual, to the Peugeot Sport-engineered 308
GTi 270 with Torsen LSD and massive Alcon brakes.

The 205 GTi arrived in Australia in October 1987. Despite strict Australian design rules mandat
ing lower compression for unleaded fuel, its pure 880kg chassis, communicative unassisted steer
ing, and adjustability on throttle lift-off won instant acclaim. The 306 GTi-6 followed in 1997
, and the 208/308 GTi by Peugeot Sport concluded a golden era in 2020.
