1. MODEL OVERVIEW & AUSTRALIAN MARKET NOTES

The definitive rear-engine sports car. Australia boasts one of the most historic ties to Porsch
e in the world: Melbourne businessman Norman Hamilton secured the Australian concession in 1951
, importing two 356s that represented the first right-hand drive Porsches ever made. Since the
911's local launch in 1965, it has defined sports car perfection through air-cooled and water-c
ooled eras, culminating in legendary Turbo, GT3, and GT3 RS icons.

In late 1951, Norman Hamilton brought the first two RHD 356 coupes to Australia (chassis 10517
and 10518). In motorsport, Jim Richards won multiple Australian Targa and touring car events in
911s. Australia consistently registers one of the world's highest proportions of Porsche GT ca
rs (GT3, GT3 RS, GT2 RS) per capita.
