1. MODEL OVERVIEW & AUSTRALIAN MARKET NOTES

The Toyota Aurion was an Australian-manufactured large front-wheel-drive sedan engineered to co
mpete directly against the Holden Commodore and Ford Falcon. Powered exclusively by the 200kW 3
.5-litre 2GR-FE V6 and built at Altona, Victoria, it also sired the legendary Eaton TVS superch
arged 241kW TRD Aurion.

Conceived specifically for the Australian market and regional export, the Aurion was launched i
n October 2006. With bespoke front and rear styling distinct from the four-cylinder Camry, the
Aurion captured fleet, police highway patrol, and family sales. The TRD Aurion 3500S and 3500SL
, developed by Toyota Racing Development Australia and Prodrive at Clayton VIC, became the worl
d's most powerful front-wheel drive production sedan at release. Production ended on 3 October
2017 with the closure of Altona manufacturing.
