1. MODEL OVERVIEW & AUSTRALIAN MARKET NOTES

The Toyota Corolla is the world's most produced passenger car and an integral part of Australia n life. Assembled locally in Victoria for over 30 years (1968-1999), it has provided dependable motoring for generations of Australians.

Australia was the first country outside Japan to assemble the Corolla, commencing at AMI Port M elbourne in July 1968 with the KE10. Local manufacture spanned KE20, KE30, KE55, KE70, AE82, AE 92, AE102, and AE112. Under the Button Plan, it was built in Altona and shared with Holden as t he Nova. In modern times, the Corolla transitioned to hybrid dominance, culminating in the 221k W GR Corolla AWD hot hatch.
